Professional Summary

Data Analyst fresher with B.E. in AI & Data Science. Proficient in SQL, Power BI, Python, and Excel with hands-on experience building end-to-end analytics solutions. Seeking an entry-level Data Analyst role to deliver actionable insights through dashboards and data-driven reporting.

Technical Skills

Languages & Querying: SQL (Intermediate) · Python (Pandas, NumPy, Matplotlib, Seaborn)

BI & Visualisation: Microsoft Power BI · DAX · Power Query · Excel (Pivot Tables, VLOOKUP, Dashboards)

Databases & Tools: MS SQL Server (SSMS) · Jupyter Notebook · Git · GitHub

Analytics Skills: Data Cleaning · EDA · Data Modelling · KPI Design · Dashboard Design · Customer Segmentation

Projects

Bank Loan Performance Analysis | *MS SQL Server · Power BI · DAX | Finance & Banking* May 2026 – Jun 2026

- GitHub: github.com/dhanavishva27/bank-loan-analysis
- Analysed 38,000+ loan records; wrote T-SQL queries to calculate 15+ KPIs including Funded Amount, Interest Rate, and Bad Loan %.
- Built 3-page interactive Power BI dashboard with slicers, DAX time-intelligence measures, star-schema data model, and cross-validated SQL outputs.

Retail Customer Behaviour Analysis | *Python · MS SQL Server · Power BI | Retail & E-Commerce* Jun 2026

- GitHub: github.com/dhanavishva27/customer_behaviour_analysis
- Cleaned retail dataset using Pandas; loaded into SSMS and ran advanced SQL queries for customer segmentation (New, Returning, Loyal).
- Built Power BI dashboard with DAX measures tracking total customers, avg spend, and revenue by category with dynamic slicers.

HR Attrition Analysis | *Python · Pandas · Seaborn · EDA | Human Resources* Jun 2026

- GitHub: github.com/dhanavishva27/hr-attrition-analysis
- Performed original EDA on 1,470 employee records across 7 business questions to identify attrition drivers including salary, overtime, and age group risk.
- Identified Sales Representatives (39.76%) as highest attrition role; provided data-backed hiring and retention strategy recommendations.

Internship Experience

Web Development Intern

2026

Wizino AI | Computer Vision & Structured Data Extraction

- Built automated race winner detection system using YOLO-based object detection and OCR workflows for structured data extraction.
- Processed and structured real-time data pipeline outputs for downstream analytical reporting.
- Gained exposure to structured data extraction, analytical processing, and data pipeline workflows

Education

B.E. — Artificial Intelligence & Data Science

2022 – 2026

PSNA College of Engineering & Technology (PSNACET), Dindigul, Tamil Nadu

CGPA: 7.7 | No Backlogs

Certifications

SQL (Intermediate) Certificate — HackerRank

Jun 2026

IBM Cloud Core — IBM

2026

Google Data Analytics — Coursera

In Progress · Expected Jul 2026
